## Adjustable Beam Direction Series

### Feature

#### 1.A simplicity of wider angle adjustment

In according to the environment require to adjust the angle of light

#### 2.Honey comb-Good choice for soft light

The honey comb louver will be synchronized changed along with the light beam angle

### 3.Luminous beam comparison before the adjustment

## LED INGROUND LIGHT

Angle Adjustable:± 25°

### Material Specifications

LED	CREE or EPISTAR LED
Housing	12#Die-casting powder coated aluminum. T=60-80um,Adhesion of ISO class 1/ASTM class 48
Front Cover	316# Stainless Steel---Hard Chromeplated
Lens	Optical lens,efficiency≥90%
Glass	Tempered glass.T=8mm
LED Driver	MEANWELL
Gland	IP68 PVC
Gasket	Tooling shaped double silicone seal
Power Cable	H05RN-F 2x1.0mm² L=0.5M(low voltage)

### Material Specifications

LED	EPISTAR SMD2835
Housing	Extruded 6063 # Aluminum
0.3m~2m, 3m length, Customized length is available on request	
Finish	Anodized or power coating
Cover	PMMA one time extrusion profile 1m, 2m, 3m length, Customized length is available on request.
Power	Maximum 20W/m
Installation	Recessed
Cable output	From the bottom or end
Characteristic	UV resistant
Application	Suit for indoor or outdoor light decoration
linear light design, homogeneous and dots free.	
Max. stand weight	30 kN
Working Temperature	-20 to 40°C

LED	CREE /OSRAM/ EPISTAR LED
Housing	12#Die-casting powder coated aluminum.
T=60-80um,Adhesion of ISO class 1/ASTM class 48	
Front Cover	316# stainless steel---Hard Chromeplated
Lens	Optical lens,efficiency90%
class	Tempered glass,T=8mm
LED Driver	Constant voltage input, Constant current output
Gasket	IP68 PVC
Gasket	Tooling shaped double silicone seal

### How to dispose the outdoor light connector correctly

Precaution of water prevention and moisture to enter the lamp through power cable IP65 / IP67 IP68, According to the research and test. The water infiltration is one of the biggest damage to the outdoors fixture. The following pictures are those typical circumstances will take place:

The effect of unused correct water proof connector

After used correct water proof connector

### Why use the water-proof connector?

When the fixture is turned on, the inside temperature will increase as the operating time goes. Conversely when the lamp stops working, the temperature will the temperature will slowly drop. This phenomenon will cause "The Siphon effect". Thermal expansion and contraction makes the inside and outside air pressure differences. The vapor will infiltrate to the housing through the wire entry as soon as the internal air pressure is smaller than the external. The infiltration is caused by several incorrect connections like the picture below:

### The best and easiest ways to prevent the water filtration are by isolating directly

We recommend using the water-proof connector like The following pictures. The connector was developed especially for outdoors lightings to make sure the fixture is protected.

### Recommend optional junction box

1. Open-end wire connection as the illustration above.
2. Please choose the appropriate main cable for the total power to be applied.
3. Installers should prepare the main cables and waterproof connectors, or buy from Belite.
4. Please take reference as fixtures' specs for its working current.
